**Request & Waiver for Rodent Bait Box**

In order to alleviate a potential health problem existing in my neighborhood with rodents, I am hereby requesting that Redford Township's Central Maintenance Department place a rodent control box in my yard.

I understand that I will be assuming full responsibility for the box and bait poison. I further understand that there is an opening on each end of bait box that is 3" x 3" and they are only large enough for rodents to enter. However, if I notice that pieces or chunks of the green with white speckled bait (or anything else that looks like it might be bait) are found outside of the bait box I will need to immediately call the Central Maintenance Department to have it serviced as this could possibly be a danger to any pets or children I may have on my property.

I understand that I must contact the Central Maintenance Department every four (4) weeks to request that the rodent control box be checked for activity and if necessary have the bait poison refilled.

I understand that after three (3) months of non-activity the Central Maintenance Department will remove the rodent control box from my property unless I request in writing that it remain in place. I also understand that if I fail to return an inactive box to the Township after one (1) year it may result in my receiving a bill for \$30.00 for the cost of the box.

I understand that if pets are outside when a Township employee comes to place the rodent control box on my property they will not be able to enter the yard and leave the box on my property. Please check the appropriate boxes below:

Yes, I do have pets

No, I do not have pets
